Focus on being the first licensed crypto ATM operator in Germany

Production Agreement with large-scale banking ATM manufacturer Perto

First-class KYC/AML partnership with leading digital security firm Yoti

Fractional Ownership Units let everyone participate in the success of the Trilliant business

Trilliant aims to push the lucrative world of cryptocurrency ATMs beyond its current limits, with feature-heavy software and future-proofing capabilities. Enjoying the benefits of the TRIL Token, owners can use them to purchase Fractional Ownership Units and claim your stake in one of our flagship ATMs.

Every single ATM that goes into operation will be divided into a certain number of Fractional Ownership Units, starting at \$100 each, which will be sold on the Trilliant website.

As new ATMs become available, they will be advertised on the Trilliant website, much like music or film tickets.

Units will be offered in different package sizes, allowing both smaller and larger investors to participate in the Trilliant program.

Do not give up your opportunity to invest in Trilliant... Here's why:

In order to purchase Fractional Ownership Units, customers need to spend TRIL Tokens, which give them amazing advantages and priority over those customers paying with fiat money.

The best way to get TRIL Tokens is by participating in the Trilliant Tokensale, where up to 38 million TRIL will be made available to the public.

The number of outstanding TRIL Tokens will be fixed after the Tokensale and no more TRIL will ever be created. TRIL Tokens can also be spent at Trilliant cryptocurrency ATMs in order to cover transaction fees. These tokens will be burned, meaning that the number of outstanding TRIL Tokens will decrease over time. As Trilliant continues to reinvest profits into the production and acquisition of more ATMs and mining hardware, the demand for TRIL will increase.

TRIL Tokens let you:

Enjoy priority when purchasing Trilliant Fractional Ownership Units

Access great discounts when getting your units on the Trilliant Website
